HDOC - 75th day
ENUMERATIONS IN C

Name - Piyush Negi **Sap_id** – 590042185

Problem Statement

Program 1: Assign explicit values starting from 10 in an enumeration and print them.

Input: Nil Output: A=10, B=11, C=12

Program 2: Use enumeration to represent menu choices (ADD, SUBTRACT, MULTIPLY) and perform operations using switch.

Input: ADD 10 20 Output: 30

Algorithm

Program 1:

1) Start.
2) Define an enum Values with A assigned the explicit value 10, followed by B and C.
3) Since enum values increase automatically, B becomes 11 and C becomes 12.
4) Print the integer values of A, B and C.
5) Stop.

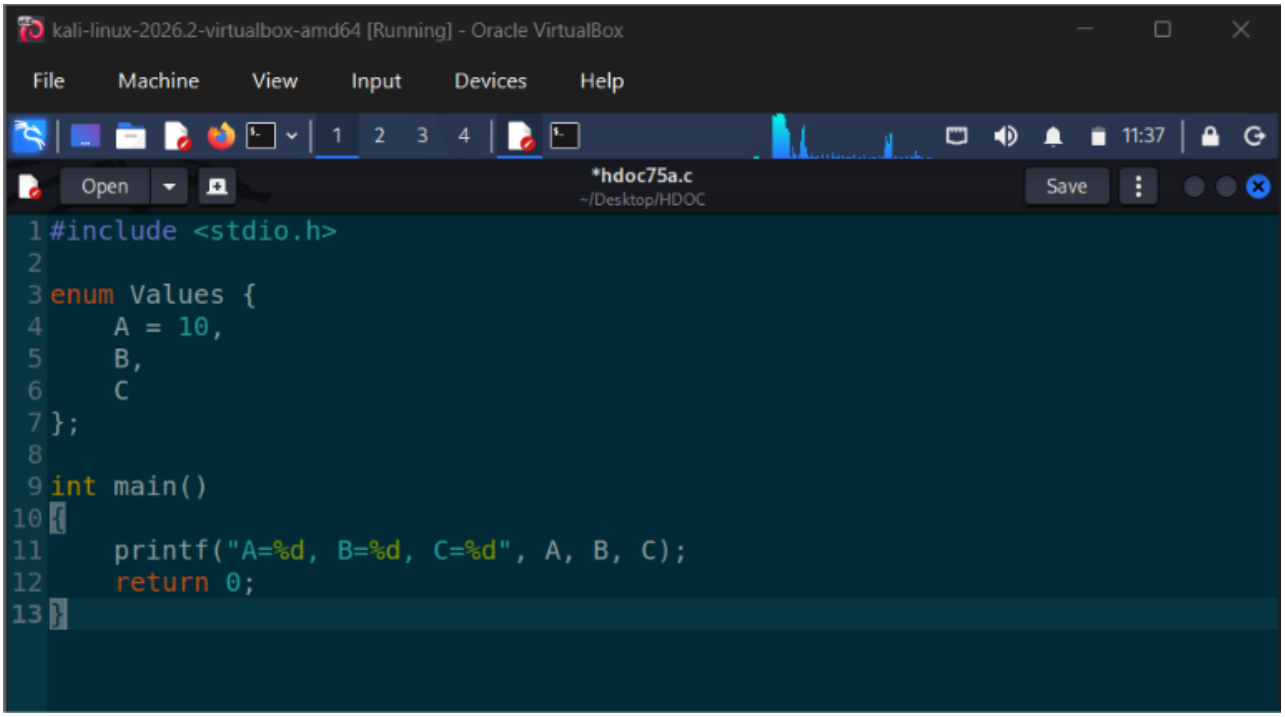

Program 2:

1) Start.
2) Define an enum Menu containing ADD, SUBTRACT and MULTIPLY.
3) Read the menu choice and two integer values.
4) Use a switch statement on the selected enum value.
5) Perform addition, subtraction or multiplication according to the selected choice.
6) Display Invalid choice for any other value.
7) Stop.

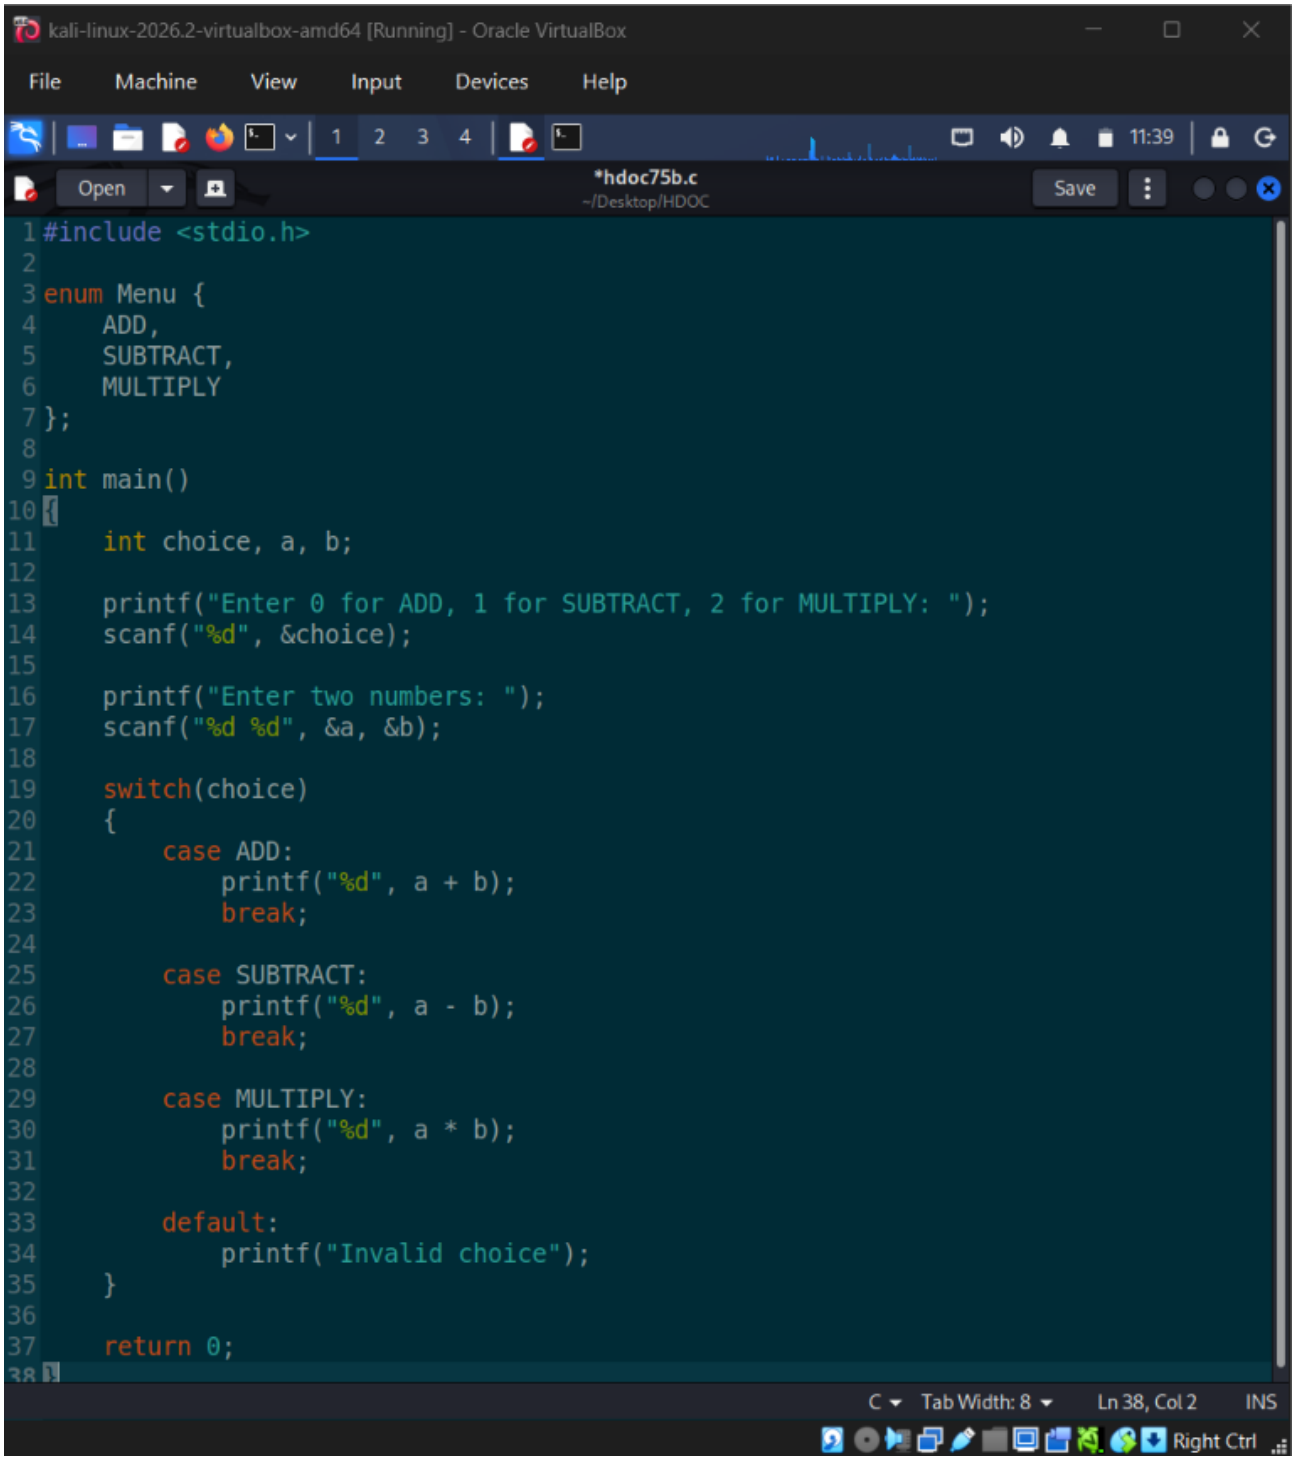

Test Case Table

S. No.	Input	Expected Output	Actual Output	Result
1	Nil	A=10, B=11, C=12	A=10, B=11, C=12	Pass
2	ADD: 5 6	11	11	Pass
3	SUBTRACT: 8 10	-2	-2	Pass
4	MULTIPLY: 9 7	63	63	Pass

C Program - Program 1

C Program - Program 2

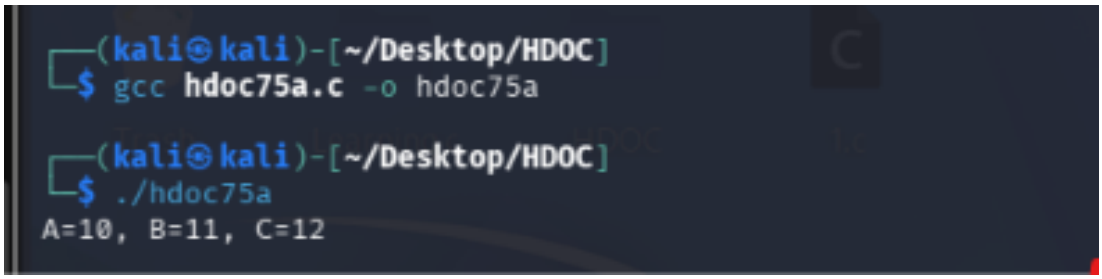

Compilation and Execution

Program 1 compilation command: gcc hdoc75a.c -o hdoc75a

Program 1 execution command: ./hdoc75a

Execution Screenshot:

Program 2 compilation command: gcc hdoc75b.c -o hdoc75b

Program 2 execution command: ./hdoc75b

Execution Screenshot:
