HDOC - 73rd day
ENUMERATIONS IN C

Name – Piyush Negi **Sap_id –** 590042185

Problem Statement

Program 1: Create an enumeration for days (SUNDAY to SATURDAY) and print each day with its corresponding integer value. The program requires no input.

Program 2: Define an enumeration for traffic lights (RED, YELLOW, GREEN). Accept a traffic-light value and print 'Stop', 'Wait', or 'Go' according to the selected value.

Algorithm

Program 1:

1. Start.
2. Define an enum Days containing SUNDAY, MONDAY, TUESDAY, WEDNESDAY, THURSDAY, FRIDAY and SATURDAY.
3. Print each enumeration constant and its automatically assigned integer value.
4. Stop.

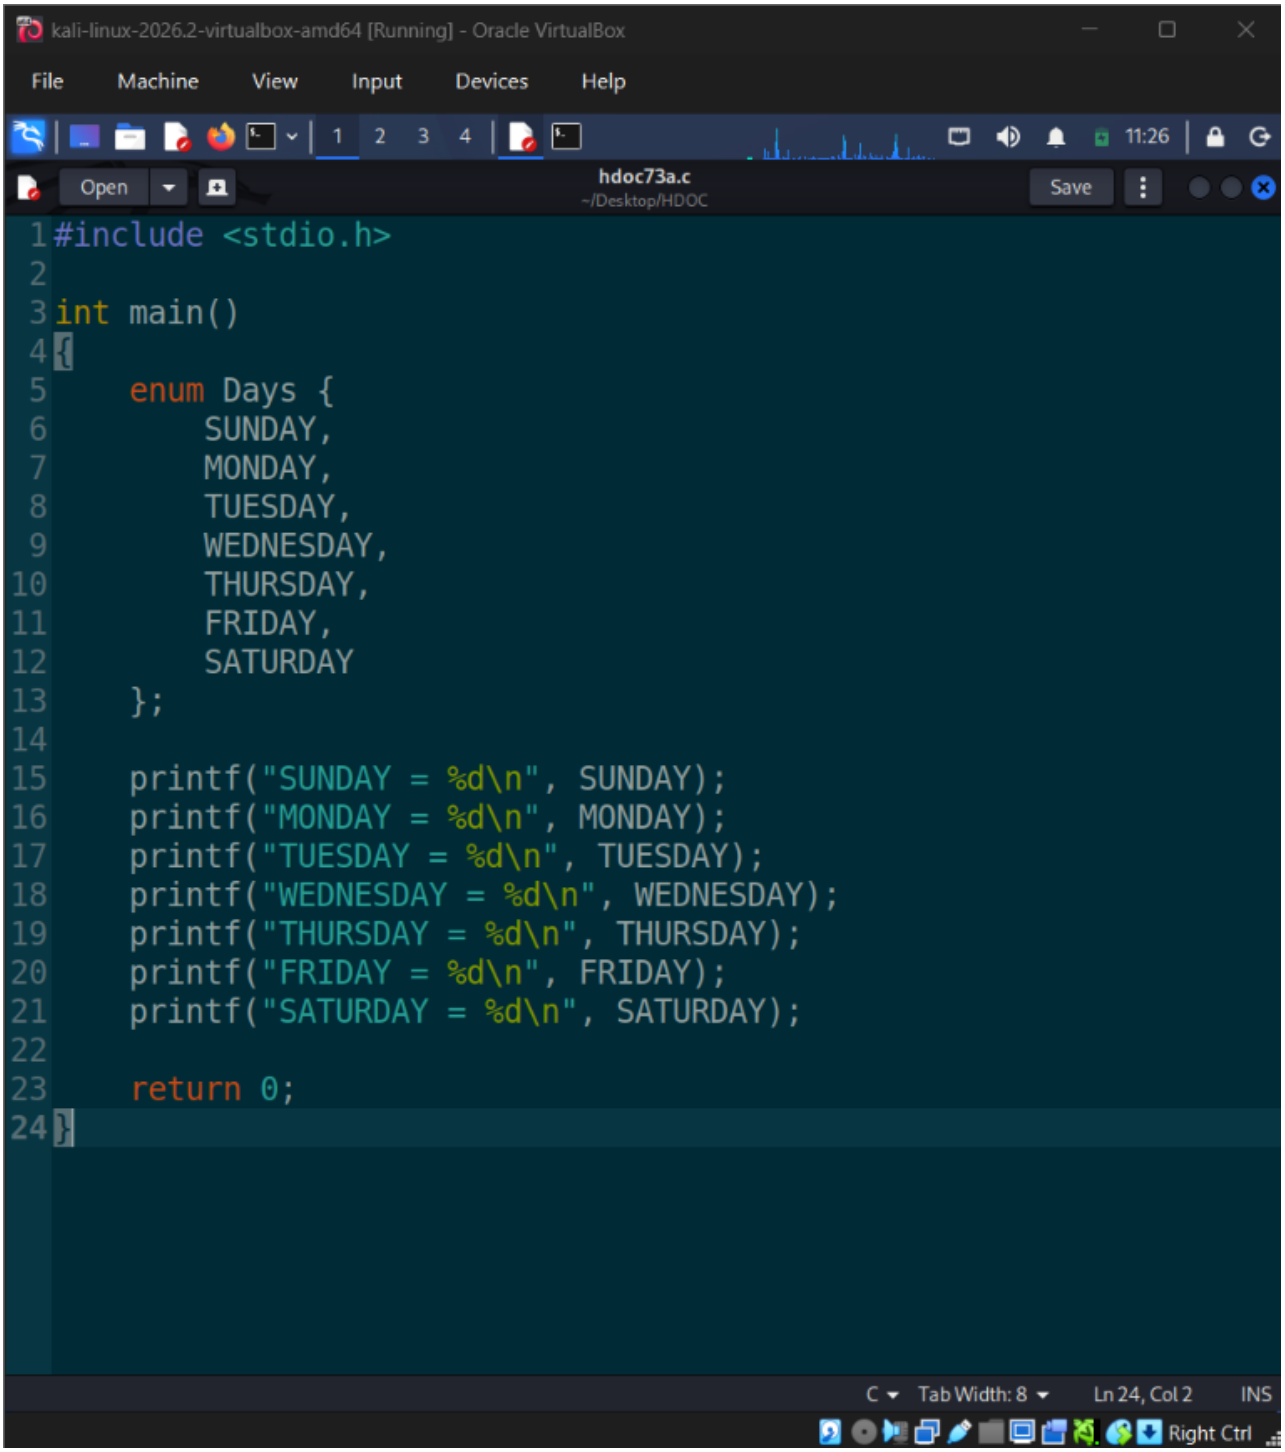

Program 2:

1. Start.
2. Define an enum TrafficLight containing RED, YELLOW and GREEN.
3. Read the traffic-light name as a string.
4. Compare the input with RED, YELLOW and GREEN and assign the corresponding enum value.
5. Print Stop for RED, Wait for YELLOW and Go for GREEN.
6. Display Invalid input for any other value.
7. Stop.

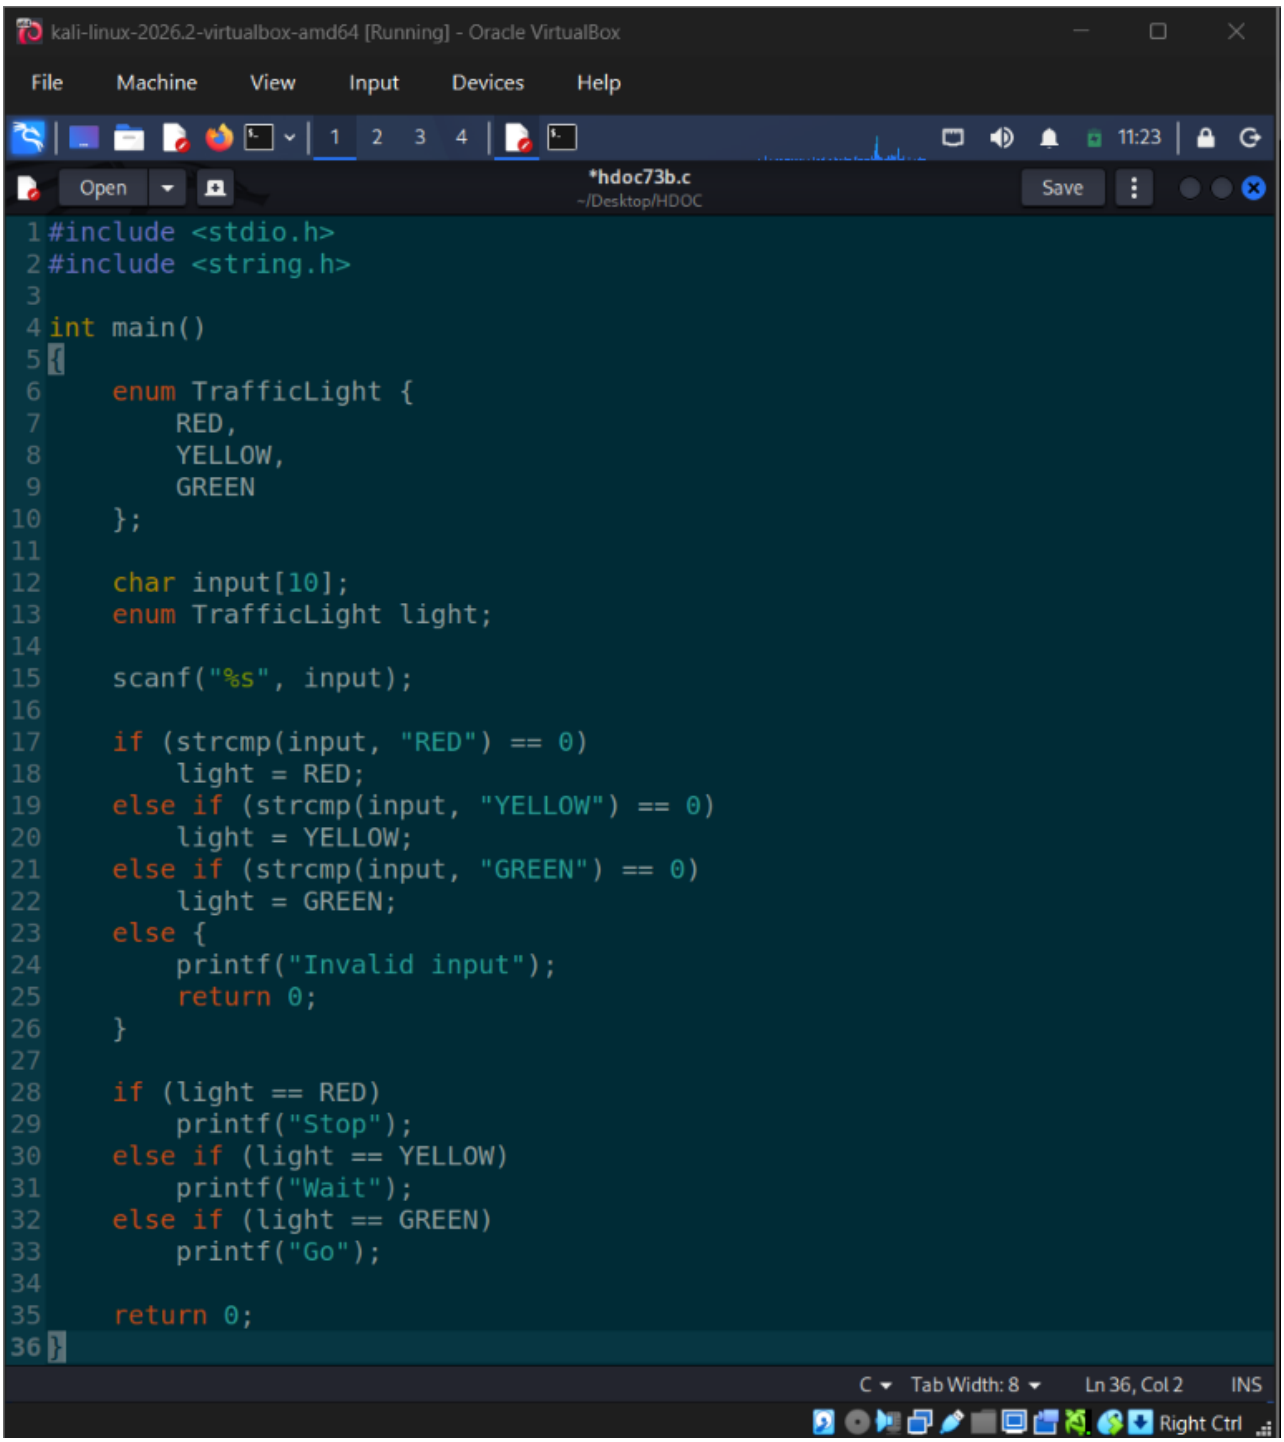

Test Case Table

S. No.	Input	Expected Output	Actual Output	Result
1	No Input	SUNDAY = 0 MONDAY = 1 TUESDAY = 2 WEDNESDAY = 3 THURSDAY = 4 FRIDAY = 5 SATURDAY = 6	SUNDAY = 0 MONDAY = 1 TUESDAY = 2 WEDNESDAY = 3 THURSDAY = 4 FRIDAY = 5 SATURDAY = 6	Pass
2	GREEN	Go	Go	Pass
3	RED	Stop	Stop	Pass
4	YELLOW	Wait	Wait	Pass
5	Red	Invalid input	Invalid input	Pass

C Program - Program 2

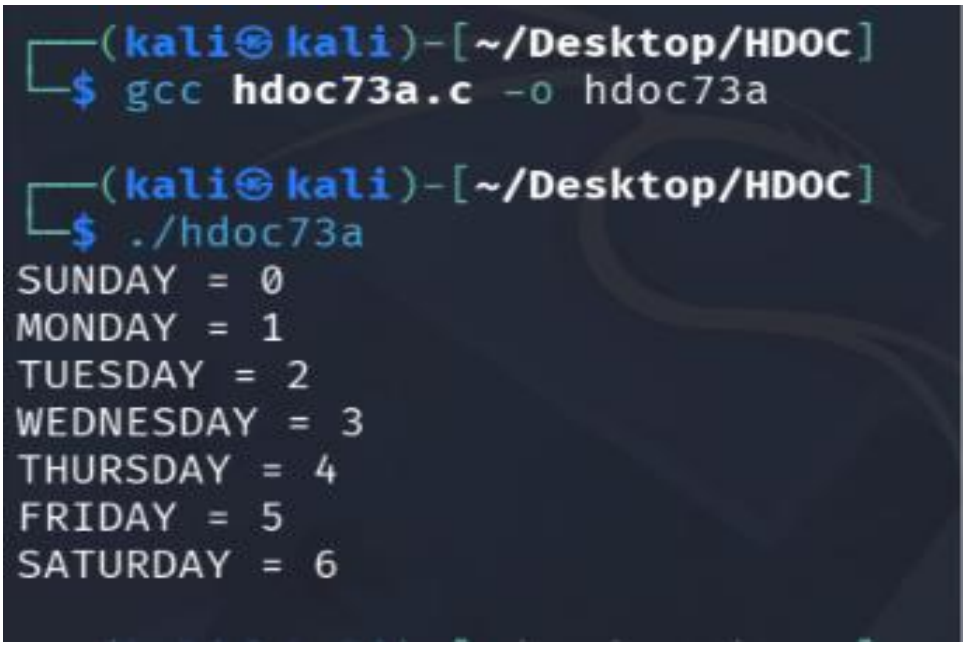

Compilation and Execution

Program 1 compilation command: gcc hdoc73a.c -o hdoc73a

Program 1 execution command: ./hdoc73a

Execution Screenshots:

Program 2 compilation command: gcc hdoc73b.c -o hdoc73b

Program 2 execution command: ./hdoc73b

Execution Screenshot:
